Bellevue's Annual Exhibition Set for Labor Day, Sept. 2

Many Entries in Various Classes from Pass Towns Will
Make for Success of Show. Big Sports Program
in Addition and Grand Dance

The twelfth annual exhibition of value in creating the incentive among the people of Bellevue and other towns to produce something better than it has been done before, and the keen competition and interest shown indicates the value of this exhibition. It helps to brighten people's lives and has cultural influence which is of incalculable value.

Bellevue directors extend a cordial invitation to all people of the Pass to spend the day at Bellevue on Labor Day. Mr. John Curry, secretary for several years, will gladly give information regarding exhibits shown, and the standard of the various classes. An exhibition such as this has a very marked

Alberta Government Buys Land for Parks

Rod & Gun Club Competition on Sunday Next

The policy of establishing a chain of public parks and people's playgrounds throughout Alberta, recently instituted by John E. Brownlee, Alberta Premier, has been put into operation with the purchase by the Government of 17 acres at Gull Lake, along the shore of this popular beach resort. The land will be used as a public park with free access to bathing and boating beaches.

The Province does not propose to establish amusement parks, but to develop in various parts of Alberta places of natural beauty which will be left to a large extent wild, where picnickers and those who wish to leave the city for a few hours or days may find adequate convenience for camping and cooking.

Mr. and Mrs. J. C. Cox intend leaving to-morrow on a month's auto trip to various states on the Pacific coast, and it is possible that they will go south to Mexico, if time permits.

Produced 15 tons of milk

Strathmore Sylvia, prize milk-bred Holstein from the Canadian Pacific Railway Experimental Farm at Strathmore, Alberta, held the record of all Canada last year for her production of 20,571 pounds of milk and 1,267 pounds of butter. She had her day-out at the Calgary Exhibition and Stampede at Calgary recently, when with others from the herd of 600 at the farm she was admired by thousands of visitors. Mike Myzak of Hillcrest, who was fishing in the closed waters of Pine Creek, paid \$10 and costs. M. Stigles of Coleman, and G. Gaynor, who had underized trout in their bags, were fined \$10 and costs each. These men also had their fishing tackle confiscated. The prosecutions were made by Mr. Holmes, the fisheries overseer for that district.

Mortgaging Income to Buy Luxuries, Says Babson

In an address delivered September 17, 1928, before the National Business Conference convened at Wellesley Hills, Massachusetts, Roger W. Babson is reported to have made this statement: "We are to day, as a people, living right up to the neck of our incomes. A good many people, as a result of the instalment system, are even spending their income before it is earned."

These words from this expert financier are worth pondering. They may explain to some extent the curious fact that in this favored land and in these times of unequal prosperity, the worries of living do not seem to diminish and the happiness of the individual still seems difficult to secure. In the race for more and still more material possessions, many have left behind the simple joys and true contentment which alone spell happiness.

Liberal expenditures by those who possess large incomes make for the general welfare by turning the wheels of trade; but the regrettable feature, as pointed out by Mr. Babson, is the mortgaging of income by people of moderate means to buy luxuries, which only the rich can easily afford; and the result is that many are constantly living in debt.

An exhibition of pool shots was given in the pool room next to the Grand Union by a man named Downes of Detroit on Monday evening. The exhibition was good but the collection poor, owing to the boys being short of cash. Mr. Downes went west yesterday to display his prowess to the boys at Natal and Fernie.

Said Edward A. Filene

Boston merchant economist to an audience of advertising men in Berlin recently: "The only right to profit in trading comes from doing a real service to the man you trade with." Yes, and furthermore: that sort of service has been found to produce the greatest profits

Pass Anglers Fined for Breaking Regulations

The Lethbridge Herald states that a number of anglers who ran foul of the law in the foothill country have paid fines for taking privileges. Mike Myzak of Hillcrest, who was fishing in the closed waters of Pine Creek, paid \$10 and costs. M. Stigles of Coleman, and G. Gaynor, who had underized trout in their bags, were fined \$10 and costs each. These men also had their fishing tackle confiscated. The prosecutions were made by Mr. Holmes, the fisheries overseer for that district.

A "Grade A" Thought for Parents

In a report just made to the board of education of New York City, Thomas M. Donahue, principal of the New York Parental School, touches upon what might well be labelled a "Grade A" thought for parents. He points out that New York school authorities did not look upon truants as "bad boys," nor class them as juvenile delinquents, but rather as "boys who have not learned to like to go to school."

How inconsistent and unjust, therefore, seems the attitude of many parents, who convict their own children as "bad," merely because "they have not learned to like it!" the correct thing. Especially reprehensible seems this attitude when it is considered that most children who have not learned to like to go to school are so because they have not learned to like discipline, instruction and self improvement, and that this lack is traceable right back to the home.

All too often these "truants" come from homes where discipline is either too lax or unsympathetic, where instruction—if given at all—is frequently given grudgingly, and where self improvement languishes for want of a good example.

As a recipe, however, which should go far toward remedying this difficulty both in the school and in the home, the following three rules recommended by Mr. Donahue seem eminently worthy of consideration:

Make the home a place of rest, inspiration and amusement.

In matters of conduct, never prescribe a "don't" without also prescribing a "do."

At the close of each day, review that day with your child. Correct the mistakes and give praise for the accomplishments. Let your child know that you are interested in him and that you believe he's going to grow up to be the best boy in the whole world.—Christian Science Monitor.

Premies Honors for Entire Dominion

In Introductory Violin Class by
Elizabeth Moore at Midsummer
Exams. in Coleman

The following letter from the principal of Toronto Conservatory of Music must have been very gratifying to Elizabeth Moore and her teacher, W. J. Harris:

Toronto, July 25

"An analysis of the markings in connection with our 1929 examinations for Toronto and throughout the Dominion, including both individual and midsummer examinations, reveal the fact that you have scored the highest number of marks awarded this season to any candidate in our introductory school violin examinations. You are, therefore, entitled to the Conservatory's introductory school violin silver medal, which will be forwarded to you in due course.

I desire to congratulate you and your teacher on your well deserved success, and trust that your musical studies may proceed as successfully as possible in the future as during the season which recently came to a close."—Ernest McMillan, Principal.

Mr. and Mrs. Fred Cox are leaving on a holiday trip to Spokane and Vancouver.

Mrs. Gardner of Edmonton is spending a holiday here visiting with her son Harry.

Mrs. G. R. Powell spent the past two weeks visiting at the home of her son Ross G. Powell in Calgary.

A carload of lambs from the big flock at Crows Nest Mountain were shipped east on Monday.

Miss Mercer and Mrs. Alex. Muir returned this week to Alex, after visiting relatives and friends for two weeks.

Mr. and Mrs. T. Blower and Mr. and Mrs. Howarth and John intended to Lethbridge to spend the week-end.

Mr. and Mrs. George A. Brown and children returned on Sunday from an enjoyable two weeks' holiday at Vancouver.

Margaret Price of the Royal Alexandra hospital, Edmonton, is spending two weeks' holiday at her home, after completing her first six months of training.

Holiday makers are returning to their various tasks. Postmaster and Mrs. Frank Graham returned last evening from a three weeks' holiday; Mr. and Mrs. H. C. McBurney and Mr. and Mrs. W. L. Hippo returned at the weekend from Waterton Lakes, also Miss Verna McDavid and Mrs. T. B. Smith. Mr. and Mrs. Corbett returned last week from a motor tour to Edmonton and Wainwright; Mr. and Mrs. Alan Brown returned from Edmonton, and others expected back before school re-opens.

The end of August will see a dropping off in tourist traffic, though the cooler weather is indeed much more pleasant for travel.

When Co-operation Should Prevail

The 1929 crop season in Western Canada would seem to present a rare opportunity for a further development of that spirit of co-operation which has been such a notable and satisfactory feature of Western economic history during the last twenty-five years. Not only is there now opportunity for such further development, but the existing situation undoubtedly calls for the practice to the fullest extent of the principle of co-operation to which tens of thousands of our Western people have devoted their allegiance.

While it may yet be early to predict just what the outcome of this year's harvest season in Manitoba, Saskatchewan and Alberta will disclose, it is now well known that in quantity of grain production there will be an enormous decline as compared with 1928. The quality may be higher, and prices substantially better, and in the final result the amount of money paid to Western grain growers may not fall so greatly below last year's figures, as many have feared and as seemed altogether probable.

But the fact remains that the distribution of crop money will not be nearly so general as in the last few years. Some sections of the West, and the farmers resident therein, will receive more money for their labor than they did a year ago. But, on the other hand, other sections will receive very considerably less, and quite a number of farmers who were forced to plough down their drought stricken fields will receive nothing at all.

Another serious feature of this year's operations is that, whereas in other years of shortage in grain crops, the man engaged in mixed farming had his cattle and dairy products to fall back upon, this year he finds himself in an even more serious predicament than the all-grain farmer, because in the sections most seriously affected, the drought has been prolonged, and the weather so hot, that the supply of feed is dangerously short.

As a result of the heavy decrease in volume of grain production it has been decided not to run the usual harvesters' excursions from Eastern Canada to maritime Great Britain in the belief that the West itself can supply all the harvest hands required. The introduction of the Cominco has operated to reduce the number of harvesters required, while the growing industrialism of the West provides a large number of men who can be drafted to the harvest fields in the full months. Again, this year, from those sections of partial crop failure, farmers and their sons can be drafted to those sections where help is needed. Also, because of the drop in volume of grain to be moved, the railways will not require as many men as in former years.

Here is where the opportunity for real co-operation presents itself. Farmers requiring harvest help should give first preference to other farmers and their sons who have suffered crop loss. Farmers requiring help, and farmers anxious to secure work, should both lose no time in making their wants known to the nearest Government Employment Office, which will be the agency to bring the two together and thus render valuable service to both.

In like manner farmers having a surplus of feed, and those others who are in dire need of feed, should both make their situation known to their Provincial Departments of Agriculture. It will be to their mutual advantage.

In the third place, many farmers will not even get their seed back this year, and will require to purchase next spring's requirements; on the other hand, many farmers will have an excellent sample of wheat for sale. Here, too, both should make report to their Department of Agriculture. Seed grain can, by such arrangement, be moved from one district to another at a minimum of expense.

In every community the spirit of true co-operation should prevail. The man who is fortunate this year should find real satisfaction in extending a helping hand to his less fortunate fellow-farmer. No one can tell, but the situation may be exactly reversed in another year. This kind of co-operation may not be quite so spectacular as the big Wheat Pool, but it is equally important, and it is the spirit which will make the Pools strong and permanent and a greater success than has yet been attained. It is the spirit of the West. Cultivate it, encourage it, develop it all along the line.

Are Easily Satisfied

Natives Of Rennell Island Accept Fish Hooks For Day's Work

An island on which an able-bodied young man is satisfied with five fish hooks for a day's work and a large axe for a fortnight's work, is described in a Colonial Report just issued. This spot is Rennell Island, one of the least known of the Pacific Islands, which was recently the subject of a geological survey. The inhabitants of the island are estimated to number at least 700 and are still untouched by white influence. They are described as "abjectly poor" and practically vegetarians.

Wainwright Oil Wells

There are sixteen wells in the Wainwright and Ribstone oil fields at present, of which six are producing to some extent. The wells vary in depth from 200 to 3,469 feet. Preparations are in progress for drilling 23 other wells in these districts.

The Province of Saskatchewan, which produces about one-half of the total wheat of Canada, is also the third producer of dairy products and of eggs and poultry among Canada's nine provinces.

Wireless For Heating

Paris May Try System Used With Success In Germany

Wireless waves sent from the Eiffel Tower may eventually heat the entire city of Paris, according to French electrical engineers who are studying the system being used in Germany. According to M. Jacques Risler, who has just returned from Germany, heating plants there are being operated by wireless waves, and although the wireless heating of houses is still in the experimental stage, the feasibility of it has been definitely established. In the tests two posts were set up in the laboratory about 30 feet apart. The sending post sent out from 400 to 500-volt current waves of a length of from two to three metres. Heat is produced by merely impressing on the receiving post circuit a filament in a vacuum, which is raised to an incandescent temperature, and the receiving posts can easily be installed in homes to become electrical radiators.

Canadian-American Airways
The first air-line connecting the cities of Western Canada and the United States was inaugurated recently at Winnipeg, when the plane of the newly organized Canadian-American Airways landed and was christened the "City of Winnipeg."

The Great Pyramid of Egypt, or Cheops tomb, is the largest building in the world. It was originally 482 feet high and it covered an area of 13 acres.

Exhibition For South America

Canada To Participate In British Empire Trade Exhibition At Buenos Aires In 1931

Canada's official participation in the six weeks' British Empire trade exhibition, to be held at Buenos Aires, Argentina, in the spring of 1931, was announced by the department of trade and commerce recently.

Canada has been allotted a separate pavilion with a floor space of nearly 40,000 square feet. This pavilion is to be remodeled by the Canadian exhibition commission and a new facade will be erected, the sculpture thereon to be suitably emblematic of Canada. This pavilion is in one of the choicest locations of the park and will be a striking monument of Canada's trade aggressiveness in South America. Copies of the prospectus of the exhibition have already been distributed by the Department of Trade and Commerce to the Canadian Manufacturers' Association, Boards of Trade and Chambers of Commerce in Canada.

RHEUMATIC PAINS

Cannot Be Rubbed Out — The Truth Must Be Treated Through The Blood

The pain of rheumatism is something that you cannot rub out. Every sufferer from rheumatism has been advised to rub this or that liniment or oil on the affected part, but after all the rubbing, the pain remained, and the patient continued to suffer, and if they are properly treated will go together. Anæmia means thin blood, and thin blood is something that can be treated so why not treat the blood until the rheumatic poisons are driven out?

This is exactly what is done in the treatment of rheumatism with Dr. William's Pink Pills. Rheumatism is a form of anæmia, as the name implies, and when the poisons in the blood are overcome and driven out, rheumatism disappears. You do not return to normal until the blood is kept right and red. The great value of Dr. William's Pink Pills in the treatment of rheumatism is shown by the case of Mr. Thomas Martin of Novia. One who was badly troubled with rheumatism that I could hardly walk and suffered great pain in his legs had to travel a great distance to get relief. He did not get much relief. Then I decided to try Dr. William's Pink Pills and after taking the pills for some time the trouble disappeared and has not since shown the least sign of returning.

You can get these pills from your druggist, or by mail at 50 cents a bottle from the Dr. William's Medicine Co., Brockville, Ont.

Should Be Useful

If beef production is to remain a major branch of agriculture in Canada, it must be stimulated and the artificial obstacles to its progress removed. The new Canadian Council of Beef Producers provides a medium through which much self work may be done, and with 1,000,000 head to market each year, producers should be glad that some organization is prepared to fight their battles.—Farmers Advocate.

Relief From Asthma
Who can complete the relief from suffering which follows the use of Dr. William's Pink Pills? Dr. R. H. Newgitt, who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choking air! It has made a remarkable change in the condition of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

The Agent—I forgot to mention that in this country house you're buying there are two very old stained glass windows.

Mr. Newgitt—That won't matter. If they're stained too bad to be cleaned I can put in some new ones.

In Berlin a noisy machine is concentrated by the police and fitted with a silencer at the owner's expense.

A Severe Attack of Dysentery Checked by 4 Doses

Mr. E. Burtonwood, 620-22nd St. W., Saskatoon, Sask., writes:—"My child, a one and one-half month old, had a very severe attack of dysentery, and after three days' treatment with other things we decided to use

On this day his condition was twenty-three times in eleven hours, but four doses checked it.

A short time ago we offered it to a neighbor whose baby was similarly affected and it was relieved with

in thirty hours.

We both always keep a bottle of Dr. William's pink pills on hand.

This medicine has been on the market for over 80 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Art Is Universal

Sir Harry Lauder Favorite With People Of All Nations

Sir Harry Lauder, associated with what is declared to be the greatest company of international artists ever offered in conjunction with the famous singing comedian, comes to the Grand Theatre, Regina, Sept. 5 and 6, with matines on Sept. 6th.

Sir Harry's art has been noted that in the Far East as well as in other sections of the world comprehended in his travels, he attracts thousands of auditors who do not understand the English language, to say nothing of the b-r-ring Scottish dialect, and yet seem to enjoy the diversified Lauder programme to the limit. In Western United States and Canada, Indians often form a considerable element in his audiences.

As Lauder is unlike any other entertainer, it is impossible to compare him with any of the other famous amusement stars. His songs are his own, and his method of presenting them is peculiarly Lauderesque.

This season Lauder comes with a repertoire of new songs, which he will offer in addition to the best and most popular of his old favorites, and with special scenic settings to fit each characterization. Some of the newer songs to be given have been popular hits, They include "I'm Lookin' For a Lassie Love Me," "It's Boss O' the House," "Susie MacLean," and others equally characteristic.

A Valuable Gift

University Of California To Receive Copy Of World Famous Bible
About 1,000 years before printing was invented a Bible was handwritten in letters of gold and silver on purple parchment by unknown artists in the Po Valley of northern Italy. It was placed in an elaborately wrought silver cover, and has been preserved at the University of Upsala, Sweden.

This is the world-famous Godex Argenteus of Bishop Wilfrid, and a copy of the very limited edition of this 1,400-year-old book is to be given to the University of California by the University of Upsala.

The book was translated by Bishop Wilfrid, or Ulba, as the Greeks called him, in the fourth century. The manuscript was lost track of for 1,000 years or more, and then came to light in a German monastery.

Saskatchewan Poor Elephants
Grain elevators owned and operated by the Saskatchewan Wheat Pool continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has gained steadily in favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for burns, scalds and various inflammatory pains its record is beyond reproach.

New Policy For Fur Traders

VIII Establish Experimental Fur Farm At Northern Posts

Northern Traders Limited, operating many fur posts in the Moose River District, has announced a policy in connection with an expansion programme—at each of the posts the company has made arrangements for the establishment of an experimental fur farm. These will be conducted along scientific lines with the animals being raised in their natural habitat. Foxes of all sorts, mink, fisher, marten, and beaver will be among the first to receive attention.

Co-Operative Poultry Marketing

Manitoba Association Now Has a Membership Of Over 12,000 Farmers

When the Manitoba Co-Operative Marketing Association, Limited, began operation in 1922, the first year's shipments totalled five cars of dressed poultry, 10 cars of live poultry, and 135 cars of eggs to markets in Eastern Canada and the United States. The organization now has a membership of over 12,000 farmers and their wives throughout the Province of Manitoba.

Likely It Ready Made

Proud Parent: "What kind of a man is this fiancee of yours?"

Prudence (his daughter): "Well, he says he has always wanted a home."

"That sounds good."

"And he likes ours very much."

Tom: "What are you writing now?"

Edward: "I am writing a biography of Ford, the motor man."

Tom: "Hadn't you better call it an auto-biography?"

Fraser River Salmon

Salmon Pack Is Showing Better Promise Than Any Year Since 1917

This year the Fraser River is showing splendid promise of coming back as a highly valuable sockeye stream, the pack showing more promise to date this year than any year since 1917, according to the Financial News of Western Canada, which goes on to say: "Sobally, the stream has been replenished after the disaster 'blackling' of Hell's Gate about 15 years ago. Not only are the fish running in quantities larger than for 12 years, but they are running earlier."

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

Lethbridge Is Growing

According to Henderson's Directory, Lethbridge now has a population of 14,062, having grown by 2,052 in the past two years, or at the rate of 1,000 annually.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sanil Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sanil in the handy, sanitary kraft-paper carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Western Representatives:

HUNTER-MARTIN & CO., REGINA, SASK.

E. B. RAMSAY IS HEAD OF NEW GRAIN BOARD

Ottawa.—The Canadian Board of Grain Commissioners will be:

E. B. Ramsay, chairman.

Prof. Duncan A. MacGillivray, Hon.

C. M. Hamilton.

This announcement was made here by Hon. James Malcolm, Minister of Trade and Commerce. Recently the three who composed the board, Leslie H. Boyd, K.C., James Robinson and Matthew Snow, resigned after many years' service.

The announcement of their successors has been awaited with a great deal of interest, particularly by those in any way connected with the grain trade.

B. B. Ramsay is general manager of the Canadian Wheat Pool with headquarters at Winnipeg, and a former banker. "He is highly regarded in the west for his financial and selling ability," says a statement making public his appointment. The statement adds:

"Professor Duncan A. MacGillivray, professor of political economy of the University of Alberta, is an outstanding economist in western Canada, who drafted the economic factors of the Turgeon report and has a wide understanding of western conditions."

Hon. Charles Magill Hamilton, Minister of Agriculture for the Province of Saskatchewan, is a practical agriculturist. All three are outstanding business men, familiar with the grain trade and representative of the three prairie provinces, one from Manitoba, one from Saskatchewan, and one from Alberta.

Naval Disarmament Plans Are Proceeding

Negotiations Between British and United States Show Satisfactory Progress

London, England.—Authoritative quarters state that the naval disarmament negotiations between London and Washington were proceeding satisfactorily.

It is predicted that Premier MacDonald will go to the United States in October, after a visit to Geneva, for the meeting of the assembly of the League of Nations.

It is expected that he will then be able to discuss tentative arrangements for a five-power conference.

It is presumed that further arrangements will be reached when Premier MacDonald meets Ambassador Dawes at Elgin-on-Auger at a time when they probably will be present at a luncheon given by that municipality.

Wants Alberta Coal But Price Prohibitive

Manager Of Winnipeg Hydro Finds Price Too High

Winnipeg, Man.—That the price was forcing him to bring in to Winnipeg, American coal for the city steam heating plant, was the statement made by J. G. Glassco, manager of the Winnipeg Hydro. He declared it appeared likely that the entire coal supply would have to be brought from across the border.

"Canadian dealers are submitting tenders for Alberta coal at \$7.90 a ton, as compared with \$7.20 quoted for the American product," Mr. Glassco said, adding: "The tragedy is that the coal we want is in Alberta."

Find Missing Pilot

C. R. Troup Of Inter-Provincial Airways Was Lost Nine Days

Montreal.—Pilot C. R. Troup of the Inter-provincial Airways, who had been missing nine days, was discovered by one of the six rescue planes that had been searching for him, 2,000 miles north of Seven Islands, Que.

He had been forced down by engine trouble.

Troup was well and suffered no ill-effects from his experience. He was flown back to Seven Islands.

Poincare Goes Home

Paris.—Former Premier Raymond Poincare has been removed from the clinic where he was operated on two weeks ago and taken to his home to await more complete recovery and a second and more serious operation about September 15. His condition was described by his physicians as "highly satisfactory."

W. N. U. 1799

Pacific Ports Lead In Grain Exports

Taking Trade From U.S. Atlantic Ports, Not Montreal

Vancouver, B.C.—Vancouver and all Pacific coast ports lead Canada in export of Canadian wheat, according to totals furnished by the Vancouver Merchants' Exchange and computed from official figures communicated by the board of grain commissioners.

Vancouver, New Westminster, Prince Rupert and Victoria shipped a total of 97,000,000 bushels in the 1928-29 season or 26 per cent. of the total Canadian export, while Montreal, Quebec, Halifax and other Atlantic ports combined exports accounted for 92,000,000 bushels of Canadian wheat.

From these figures it is deduced that Vancouver is not cutting in on the trade of Montreal, but is shipping at the expense of United States Atlantic ports, which shipped 67 per cent. of the total in 1921-22 and have since declined to 46 per cent.

The Merchants' Exchange figures do not take into consideration grains other than wheat and shipments of United States wheat through Canadian ports are omitted.

Chinese Leave Under Bond

Return To China For Trial On Opium Smuggling Charge

San Francisco.—Mr. and Mrs. Ying Kao and Sun Foon, former attaches of the Chinese consulate here, who are under Federal indictment for an alleged attempt to smuggle \$600,000 worth of opium into the United States, sailed for China on the liner "Shinyo Maru." They left under bond and with the formal permission of the United States government.

Washington.—Secretary Stimson said that the return of Mr. and Mrs. Ying Kao and Sun Foon, formerly connected with the Chinese Consulate at San Francisco, to China, had the desire of the Chinese government, and that the prisoners had waived trial in the United States on charges of opium smuggling or complicity.

The government has secured assurances, he said, that the three would be prosecuted by the Chinese government.

Advise Return To Bognor

Better For King George Than Sandringham Say Doctors

London, England.—The Daily News says that King George's doctors had advised him to return to the seaside at Bognor for further recuperation instead of going to Sandringham, His Majesty's favorite country estate. The court encouraged the improvement in the King's health since his second operation, had planned to go shortly to Sandringham.

The Daily News added that it was feared the King might be tempted to exceed his strength at Sandringham by indulging in horse shooting of which he was very fond.

This danger would be avoided if he could be persuaded to remain in London for a short time and then go to Bognor for the next few months.

He would stay at Craigwell House, where he was moved from London after his grave illness last winter.

Probing Status Of Women In Quebec

Special Commission Appointed To Study The Question

Quebec, Que.—The provincial cabinet, at a meeting here, appointed a special commission to study the question of the legal status of women in the province of Quebec. The members of the commission will be Judge C. N. Dorion, Chief Magistrate F. Roy, and Joseph Shiras, notary, all of Quebec City, and Victor Morin, notary, of Montreal.

Triple Drowning Accident

Edmonton, Alberta.—Word of a triple drowning tragedy at a picnic at Hanna Beach on Buffalo Lake near Botha, Alberta, was received at Edmonton. The victims were Mary Horton, 15; Francis Horton, 14; and Edna Fay, 14. The three girls went to their death when they stepped into a deep hole while bathing. The Horton girls were sisters.

Salts For Home

Quebec, Que.—Eric Geddes, a former minister of transport in the British war ministry, and now chairman of Imperial Airways, limited, sailed from Quebec on the "Empress of Australia," following a brief business visit to this country.

British Columbia Fire Situation Is Serious

Pacific Coast Province Shrouded In Fall Of Smoke

Vancouver, B.C.—With the whole of the southern interior of British Columbia shrouded in a pall of smoke from a hundred and fifty fires, the first situation in this province is reported by forestry officials as very critical. All available unemployed men in Nelson and vicinity have been called to fight the outbreaks and additional men recruited in an effort to cope with the situation. So dense is the smoke at Nelson that the forestry seaplane is unable to leave the water on account of the poor visibility.

A serious situation exists at Tunnel, between Grand Forks and Nelson, in the boundary district, where fire fighters are doing their best to subdue the fire raging there, without the aid of water. Fire at Westbridge, also in the boundary district, is out of control. The Sheep Creek outbreak, on the international boundary, is reported under control.

The forest fire situation on the lower mainland and Vancouver Island remains extremely hazardous.

Particularly serious are conditions in the vicinity of Campbell River, Vancouver Island, where fires are menacing large tracts of standing timber.

THOMAS SEEKS OPENINGS HERE FOR UNEMPLOYED

London, Eng.—When Rt. Hon. J. H. Thomas, Lord Privy Seal and unofficial Minister of Employment reaches Ottawa, he will communicate to the Canadian Government that more openings for British labor could be created in the Dominion if British capital and enterprise were utilized more fully to develop Canadian industries, according to the Manchester Guardian.

The newspaper declares that Mr. Thomas wants to carry out the Board of Trade suggestion that British industry might set up manufacturing concerns in Canada, a suggestion that is sometimes referred to as "putting the other leg in the door."

The Guardian also says that Mr. Thomas may stipulate that if a considerable amount of British capital is to be invested in Canadian public works, such as the construction of roads, British labor must be employed. And if the Canadians reply to this in a question as to the fate of the British workers when the roads are completed, Mr. Thomas will answer in view of the rapid development of Canadian industries there would be a reasonable prospect of absorbing such immigrants permanently.

The Guardian, however, thinks there will be no surprise if Mr. Thomas accomplishes less than he hopes.

Credit For Bank Of England

New York.—The Bank of England's store of gold dimmed by French purchases to the lowest point of year has made an arrangement whereby a credit of about \$250,000,000 can be established here at a few hours' notice.

HEADS BRITISH MEDICAL ASSOCIATION

Dr. Harvey Smith, native of Winnipeg, who has been formally elected president of the British Medical Association will meet at Winnipeg next year.

Excellent Wheat Yields Reported In Alberta

European Settlers In Alberta Will Reap Great Dream Of Wealth

Winnipeg.—A number of European immigrants who came to Canada with their dreams of wealth will have their dreams fulfilled, according to N. M. Ostryzuk, of the Dominion Colonization Company, at Edmonton, who declared here that excellent wheat yields are reported in different parts of Alberta where the immigrants have taken farms.

At Federow, 30 miles north of Edmonton, farmers are reaping from 35 to 50 bushels per acre of new broken land. At Roycroft, in the Peace River country, where Mr. Ostryzuk has a 400-acre farm, wheat is 40 bushels. Leduc, Alberta, reports that the yield in that district will be from 40 to 50 bushels per acre.

At Fedorow, 30 miles north of Edmonton, farmers are reaping from 35 to 50 bushels per acre of new broken land. At Roycroft, in the Peace River country, where Mr. Ostryzuk has a 400-acre farm, wheat is 40 bushels. Leduc, Alberta, reports that the yield in that district will be from 40 to 50 bushels per acre.

At Federow, 30 miles north of Edmonton, farmers are reaping from 35 to 50 bushels per acre of new broken land. At Roycroft, in the Peace River country, where Mr. Ostryzuk has a 400-acre farm, wheat is 40 bushels. Leduc, Alberta, reports that the yield in that district will be from 40 to 50 bushels per acre.

MCLAUGHLIN - BUICK

To the man who buys Buick miles . . .

a BUICK is always a BUICK

There is only one fundamental class of Buick motor cars—they are all Buicks—and the man who buys the second ten-or twenty-or fifty thousand Buick miles—does so because he knows they'll be the kind of miles that Buick alone can give.

He invariably is a man who combines keen judgment of values with a true appreciation of the fine things of life. He selects Buick, out of the entire field of possible purchases, because of the high character of those Buick miles.

He knows that Buick builds into every car scores of thousands of miles of joyous, reliable, uninterrupted service. He knows that he and his family will experience that extra measure of comfort, safety and roadability which only a car of Buick size and stamina can provide.

He knows his Buick will be no more a "used car" in the ordinary sense of the term than the home he lives in is a "used house." He knows, as a positive fact, that Buick will prove a gratifying and satisfying investment.

And so he buys a Buick—and makes doubly sure of its reliability by buying it from the Buick Dealer in his community. And he obtains from it, dollar for dollar, the full measure of motor car value he expects to obtain—

—because Buick builds for the years—because Buick motor cars truly reflect Buick craftsmanship—because throughout the entire term of its remarkably long life, a Buick is always a Buick.

Here and There

(382)
Canada has one motor vehicle for every nine persons of population. A recent estimate places the aggregate number of motor vehicles in the Dominion at 1,076,819. Only three countries exceed Canada in heavier density of motor cars, namely, United States, with one for every 5.1 persons; Hawaiian Islands 7.9 persons, and New Zealand 8.9 persons.

The New England conscience got buy recently in a small town in Maine, U.S.A., where a resident mailed back a memorandum to the maître d'hôtel of the Royal York, Toronto, a package of spoons, serviettes and dining room "sundries" borrowed from the hotel previously. The writer, in returning the articles to Monsieur Maillard, the maître, said: "My conscience has been bothering me a great deal since and I have been unable to keep them any longer."

The Sioux Indians, Alberta, can now be said to be "winning race" for while the section of the tribe living on the Nordegg reserve was making a two-week trek to attend the annual Indian pow-wow at Banff, four babies were born. Mothers and children are healthy and well.

Last spring a man came into the C. P. R. ticket office on Sparks street, Ottawa, for a ticket to Leonard when he had a job. He was five cents short on his fare, but the railway gave him a ticket anyway. The other day he came again in overalls and waited outside the Sparks street office and said: "I owe you five cents on a ticket; here it is."

Hon. Chas. Stewart, Minister of the Interior, who has been flying over the Rocky Mountains recently, announced at Banff that the buffalo herd there had increased rapidly shortly by addition of animals specially selected from the herds at Waterton and Elk Island.

Canadians are the world's greatest butter eaters. A recent compilation made by the Canadian Government Bureau of Statistics shows that the total consumption of butter in the Dominion last year was 230,000,000 pounds or a per capita consumption for the year of 29.31 pounds, an increase of nearly half a pound per head of population compared with 1927.

J. M. R. Fairhurst, chief engineer, Canadian Pacific Railway, and P. F. G. Galy, manager, Ontario Hydro-Electric Commission, have been selected as Canadian delegates to the Tokio sectional session of the World Power Conference to be held in Japan in October. They were nominated at a meeting of Canada's executive conference committee.

The steady increase in the use of electric power per capita in Canada is shown by a comparison of the figures for 1920 and 1927. During this period the amount of power used per 100 of population increased from 43 to 63 horse-power, or the use of power per inhabitant increased over 46 per cent.

As an indication of the increasing popularity of Nova Scotia as a tourist resort, the Lord Nelson Hotel, Halifax, has built a large new restaurant and meal service with 245 positions sitting down to breakfast, 252 for luncheon, and 270 for dinner.

WORLD HAPPENINGS
BRIEFLY TOLD

"Lord Baden-Powell of Gilwell and Essex" is the title taken by Sir Robert Baden-Powell, founder and chief of the Boy Scout movement.

Control of food prices in Britain is likely to become a matter for legislation when parliament re-assembles.

A recent report issued by the immigration office at Sault Ste. Marie, shows that 12,196 people entered Canada from the United States at this point during June.

Peru has ended its long abstinence from participation in the affairs of the League of Nations. Decision has been made to resume full co-operation in all activities.

Sir Horace Plunkett, veteran Irish statesman, and bachelor, is learning to fly at the age of 75 years. He is taking lessons at the Brooklands air-drome in Surrey, England, and is keen as a boy.

Two Western Canada candidates were successful in the primary examinations for the fellowship of the Royal College of Surgeons, of England. Tests were held in Toronto for the first time in Canada.

Setting a record for all time 121 deaths required a coroner's investigation in Toronto during July. Of these, 39 met violent deaths through industrial mishaps, motor smashings, and other accidents. Suicides and sudden seizures took large tolls.

You can rent an airplane at Kansas City, Missouri and fly it yourself if you have a pilot's licence. Saunders' Fly-it-yourself Company, has been formed with 200 sport planes. The rental charge is \$15 and \$20 an hour.

Dr. Hartley Smith, former president of the Toronto Academy of Medicine, and one of the leading physicians in Canada, died at the Toronto General Hospital recently. Dr. Smith was for many years Italian consul in Toronto, and was well known in military circles.

Exports Of Pulp and Paper

Considerable Increase Shown In First Half Of Current Year

For the first half of the current year exports of pulp and paper valued at \$97,199,980, as compared with \$94,104,081 in the corresponding six months of 1928, according to the monthly report of the Canadian Pulp and Paper Association. Wood-pulp exports for the period amounted to \$21,470,505, and exports of paper to \$75,729,475, as compared with \$22,330,880, and \$71,764,201 respectively for the first half of 1928. Pulp-exports have been smaller this year, the six months' shipments being valued at \$5,942,620, as compared with \$6,926,000.

Canada's Forests

The total forest area of Canada is estimated to be 1,151,454 square miles. Of this area, 865,880 square miles are productive and accessible; a little over one-third of this area bears timber of merchantable size; the remainder carries young growth not yet fit for use.

Any first-class watchmaker can deliver selections from his own works.

Too Much Low Flying

Habit Is Menace To Public and Should Be Prohibited

Aeroplane pilots crashing as a result of collisions with telephone or telegraph wires or falling on account of losing their altitude a few hundred feet above the earth brings up the danger of persons on the ground when accidents of this kind occur. The newspapers recently carried a despatch from Kentucky about a student pilot crashing in the centre of the business district of a Kentucky town, killing the aviator and two business men.

Those who are interested in flying and genuinely anxious to promote the development of aviation have been doing everything in their power to bring into effect regulations that will make for the safety of those who fly and those on the ground. Despite their efforts it is possible that too much flying at a low altitude is being done over Western Canadian cities and towns. Aeroplanes a few hundred feet above a city street are a menace to citizens. The accident that cost three lives in the Kentucky town might be repeated here.

The authorities, no doubt, would have the hearty co-operation of aviation officials in framing regulations that would prevent flying over cities and towns except at a height that would give the pilot a chance to glide to an open landing place in case of accidents. Furthermore, no pilot should be allowed to fly above or around a city or town who is not familiar with the location of all power, telephone, and telegraph wires.

Aviation is so important that everything possible must be done to reduce risks of every kind. Regina Daily Post.

PARIS COTTON FROCK

It is quite possible to appear smart, dainty and comfortable this season, because Paris deems the sheer limited cottons are never to be out of summer wear. Since No. 562 is strikingly effective in printed cotton voile, it is in daffing capitone tones which enhances the charm of the fabric. The piped belt is a new idea in swathed effect through drap of skirt. It is a fetching dress for town or resort. It comes in sizes 16, 18, 20, 22, 24, 26, 28, 30, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200, 202, 204, 206, 208, 210, 212, 214, 216, 218, 220, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256, 258, 260, 262, 264, 266, 268, 270, 272, 274, 276, 278, 280, 282, 284, 286, 288, 290, 292, 294, 296, 298, 300, 302, 304, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 338, 340, 342, 344, SYNOPSIS

Marcus, the famous Broadway producer, visits Blackie Joe's New York night club, where he hires Al Stone, Blackie's singing waiter, render a love ballad of his own composition. Marcus offers to buy the song and a concession, promising the producer will hire Motty, his sweetheart, to sing the song in one of the Marcus revues. Marcus agrees. Motty is a blonde who has been told that because she was only a waiter, but now she makes up to him. Thus the night ends with two persons, Al and Motty, supremely happy. But there is sadness in the heart of Grace, the beautiful cigarette girl, who is still deeply in love with Al. She runs quickly home to hide her tears.

CHAPTER IX.

Time heals the sharpest wounds, say the philosophers. Perhaps, but the memory of the wounds may last a long long time. Fortunately is the man or girl who has the strength to keep those memories from becoming bitter.

Grace Farrel, the cigarette girl at Blackie Joe's, was such a person. At Stone and Motty Winton had left and become headliners on Broadway. As the weeks lengthened into months Grace heard reports of their achievements and saw their pictures in the papers. Al had become one of the outstanding song-writers of Tin-Pan Alley; his melodious scores featured all the Marcus revues. His ballads and comic numbers had made him famous throughout America. Motty, true to Al's prediction, had become a headliner in the Marcus musical shows.

Once Grace begged time off from Blackie to see the outstanding Marcus show of the season. She had hoped Al would appear, but he didn't. However, Motty was there as one of the featured performers, singing Al's words and melodies. Grace, leaning forward in her first row gallery seat, had to admit Motty put the songs over well. Motty was deft, graceful, self-posse ssed, and she knew how to get the most from a song's variations.

"Perhaps I was wrong in thinking she couldn't make Al happy," mused Grace. "She certainly knows her business and she is awfully pretty."

Yes, Motty was pretty. Yet Grace's intuition told her, even from this distance, that there was something cold and calculating about her successful blonde rival. Her smile and gaity made Grace distrust her.

But Grace caught herself up on these critical thoughts—perhaps, she reasoned, they came from jealousy. She determined to stifle them. They weren't fair to Motty.

Occasionally Al revisited Blackie Joe's and received congratulations from his old friends, but Motty never deigned to set foot in the place where she had started her climb up the ladder of fame. "That's Motty—too high-hat," murmured Blackie Joe to Grace in explanation.

Grace never forgot Al's first visit

to Blackie's after Broadway had claimed him for its own. She was very busy with her cigarette tray, her head lowered, when a familiar voice inquired:

"How much the lot, Grace?"

Grace almost tipped the tray over in her astonishment and delight. Then stood Al, resplendent in the latest cut of dinner coat, with the same happy, boyish smile, the same kindly eyes, the same white, even teeth.

Al leaned over, before Grace knew what he was about, and kissed her lightly on the cheek. It was merely a quick, friendly peck, with no hint of romantic feeling, but because the Marcus producer was unprepared, Grace blushed crimson. Al did not know that his carefree gesture aroused fresh the profound love-for-him that had caused Grace sleepless nights and that she had managed to control only recently.

Grace almost tipped the tray over in her astonishment and delight. Then stood Al, resplendent in the latest cut of dinner coat, with the same happy, boyish smile, the same kindly eyes, the same white, even teeth.

often dissension. You and Molly are the ones that way."

Marcus' mysterious little smile and Al moved toward the door. "Molly's the one who's unusual—she's perfect!" said Al, and disappeared through the door.

He wondered what Marcus meant by that mysterious smile, but dismissed it from his mind as he rode down in the elevator. Then he turned the corner, ran across the street, and entered another elevator to be whisked aloft to the Manhattan Roof. He found Molly in her dressing room, garbed for the street, chatting with John Perry.

John Perry was Al's best friend and a peculiar individual. The most peculiar thing about him was his mysterious source of income. He never seemed to work, yet he had plenty of money and spent it freely. Along the White Way they called him a racketeer and said he controlled the illicit distribution of contraband liquor in a district peppered with high-class night clubs.

Physically he was decidedly prepossessing, being tall and dark. When Molly and Al had first arrived on Broadway, John Perry had sung many praises and done them many little favors, who liked everybody, had taken a decided fancy to John, and had frequently talked over his songs with the debonair racketeer. Molly hadn't seemed to like John so much at first, but later his charm of manner won her over, and her attitude had been quite friendly.

Perry jumped up the moment Al entered and proffered his hand. "Well, Al, old top, I've been visiting Molly. Hope you don't object." "Not at all!" Al dismissed the suggestion with a laugh and a wave of the hand. "I like Molly to meet other men. And you know, John, I regard you as one of my best friends."

John Perry raised his glance toward the ceiling, shrugged his shoulders, but did not answer.

"Shall we go, Al?" said Molly quickly and rather nervously. "I've been waiting for you some time."

"Sure, right away, I was detained talking to Marcus about the new show. I have arranged for you to have the pick of the songs. Where shall we go, a club or home?"

"Let's go home, Al, I'm tired." As they left the dressing room Al went down the narrow corridor. He did not see Perry give Molly's hand a surreptitious squeeze as he followed.

(To Be Continued.)

Weighs Canadian Outlook

BANK OF MONTRAL SAYS OTHER ITEMS WILL OFFSET SMALL WHEAT CROP

Canadian prosperity will not be affected by the failure of the wheat crop this year because of numerous favorable features in the commercial field at large, according to a business summary issued by the Bank of Montreal. The report estimates the wheat crop at 360,000,000 bushels, with a possibility that it may not reach this figure, which will be the smallest crop of wheat in Canada since 1924, when the yield amounted to 262,097,000 bushels. The report says:

"In the five years elapsed since the partial crop failure of 1924, a large development of Canadian resources, industry and trade has occurred, but harnessing water power in western Canada has been made in harnessing water power in western Canada has been made in the timber and pulp industries, in the fabrication of iron and steel, in output of minerals and in all departments of domestic trade, aggregate wealth of the nation is greater than ever before. Midsummer, formerly a slack season in business, now brings a large influx of tourists, whose expenditures multiply, and branches, and this year the invasion is making a new high record. Viewing the commercial field at large, it can, indeed, be said that favorable features outnumber the unfavorable and that the volume of commodity production and distribution is at the highest level."

FORTY BIRD SANCTUARIES

Forty bird sanctuaries have been reserved in Canada by the Department of the Interior under the Migratory Birds Convention Act, which is the Federal law for the protection of migratory birds. There are also fifty-one shooting grounds reserved by the Dominion Government in Western Canada. Shooting is allowed on these latter areas in the open season.

A COMMON VARIETY

Villager (showing stranger overgrown cottage): "Three hundred years old this be, sir; never a stick or stone altered in all them years."

Visitor: "I've a landlord like that, too."

Minard's Liniment for Neuralgia.

Over 400,000 women and girls who were weak, "blue" nervous, run down, and unable to do their work properly, have improved their health by using Minard's Liniment.

Minard's Liniment is a liniment made from the bark of the Mimosa tree, which is a native of South America.

It is a powerful stimulant and tonic, and is especially useful in neuralgia, rheumatism, sciatica, and other diseases of the nervous system.

The 1930
McLAUGHLIN
-BUICK

The Greatest Success
 in all McLaughlin-Buick history!

NEVER, in McLaughlin-Buick's long, successful history, has any new model been accorded such spontaneous and enthusiastic acclaim as McLaughlin-Buick for 1930. From every province, from East and West, are already coming reports of the most amazing volume of sales ever recorded for any McLaughlin-Buick within its first two weeks. Hundreds of buyers did not even wait for demonstrations, but placed their orders unconditionally, upon their first inspection of this "greatest McLaughlin-Buick of them all." It was inevitable that this New 1930 McLaughlin-Buick . . . three great new series, larger, more powerful, more beautiful, more luxurious than ever . . . should win an instant and exceptional success. See it for yourself at our showrooms.

Mail Order Houses Active

One thousand and nineteen families, all residing within a radius of twenty miles of Hanna, were circulated this week by one of Canada's leading mail order houses. A total of 1,019 catalogues, each weighing 24 lbs., and costing seven cents each to mail, were placed in the homes of this district, right within the trading area of which Hanna is the centre. In addition to this number, several hundred additional catalogues will be distributed within Hanna's trading area through post offices situated just beyond the twenty mile limit. That is to say that this one mail order house is placing a "printed salesman" in probably 1500 homes which consider Hanna as their trading centre. This little piece of mail order penetration, for this district alone; this one advertising effort, by only one mail order house, will cost in the neighborhood of \$900.00. There are two mail order concerns of approximately equal importance, which cover the West. Approximately the same number of printed salesmen will come in from the second firm, thereby doubling the above figure. Two "general catalogues" are issued each year, which brings the value of general mail order catalogues distributed here annually, by these two firms alone, to the neighborhood of \$3600.00. This figure must be materially increased when one considers the fact that there are dozens of smaller concerns, each mailing their catalogues, "spring and summer," "fall and winter" and "sale." The amount thus spent is stupendous. But these firms would not continue to spend money in this way unless they were profiting by the practice.

Hanna is but one of hundreds of communities in Alberta where the influx of mail order catalogues was experienced this week. The campaign of the mail order houses to secure fall business is on in earnest, and no community is overlooked. No retailer is beyond the competition of these concerns, and the sooner such retailer recognizes that fact and stirs himself to meet that competition, the more business he will retain at home.

The mail order house today is faced with the most serious situation in its history. The motor car has brought the rural dweller closer to the show window of his home town merchant. It is now much easier for the consumer to go to the biggest trading centre in his territory and see what he is about to purchase. The mail order house is forced to make greater expenditures than ever, on his catalogues and printed circulars, and this increased cost makes it just that much harder to compete with local merchants.

But to compete, today, with mail order houses; to even remain in business, the local merchants throughout the West must realize that their best weapon against mail order competition is the very instrument used by the outside houses to secure business — advertising. Liberal illustration of the goods for sale, with liberal display of price figures in newspaper and direct mail advertising, circulated through the local community, will prove the best method of increasing the confidence of our neighbors and securing their business.

Along with Hanna, there are about ninety towns in Alberta having local newspapers. If the business men of these towns were to use printing to develop and hold trade, as judiciously as do the mail order houses of Winnipeg, Regina, Vancouver and all, the home trading area would see fewer catalogues, because the local consumer would soon learn that the majority of his wants could be filled quite as well within his home town — Hanna Herald.

Mr. and Mrs. Maurice Cooke returned on Saturday from a two weeks' trip to Saskatchewan and returned via North Dakota and Montana.

Here and There

(270) Two scholarships at McGill University, Montreal, covering five years' tuition for employees who attain minor or major awards of employes have been awarded by the Canadian Pacific Railway this year, one to P. Sturges, son of E. F. L. Sturges, eastern general manager agent and the other to William P. Dunlop, son of John Dunlop of the pension department of the Canadian Pacific Railway. The company has given a scholarship for five years to each of the two winners.

Right Hon. William Churchill, Canadian Minister of Education in Great Britain, arrived in Canada recently at the Baldwin Government in West Block, arrived in Canada recently at the Empress of Australia and made a tour of the country from Montreal to Victoria. He visited Toronto, Hamilton, Niagara Falls, Winnipeg, Regina, Edmonton, Calgary, Banff, Lake Louise, Steamboat Springs, and Jasper Park. He will leave the latter city September 5 arriving at Seattle the same evening. He travelled Canadian Pacific railway and steamships during the whole of his trip.

Purchased for a sum in excess of \$200,000.00, the steamer *Lord Peterborough*, Sir Andrew Van Dyck, court painter to King Charles I, was carried by the Canadian Pacific Express Company by steamer *Macdonald* from Liverpool to Canada; very special precautions being taken to ensure safe delivery. It was bought by A. J. Nesbitt, prominent business leader of Montreal.

Commercial apple crop in the province of Nova Scotia this year will total about 1,500,000 barrels, about 30,000 less than last year. The Ontario crop is estimated at 770,000 barrels, up 210,000 barrels over 1928. The British Columbia crop is estimated at 3,300,000 boxes, about 19 per cent less than last year. The raspberry crop is reported good all over the Dominion.

As a result of experiments conducted over several years past, officials of the Canadian Federal Department of Agriculture have assured that two or three varieties of wheat have been at last developed that will resist rust. No names have yet been given to the new varieties, but it is expected in three years before they can be produced in sufficient quantities for seed distribution.

Hans Andersen, his wife, two daughters and two sons, are the first settlers to arrive for the new Delta Colony in Hanna County, Nova Scotia, which is being promoted by the Canadian Pacific Railway Colonization and Development Department. They have gone to the Welsh district, where they purchased a farm and will go into dairying and hog raising on a large scale.

Since 1921 the total turbine installation in the Dominion has increased from 2,754,000 horse-power to 5,350,000, or about 50% more power, having been installed in 1928. Developments now nearing completion or in active prospecting will, on completion, add a further two million horse-power within the next few years. In the Prairie Provinces the developed horse-power has nearly trebled since 1921.
